

formatR: Format R Code Automatically

Yihui Xie*

August 5, 2013

The package **formatR** (Xie, 2013a) was designed to help users tidy (reformat) their source code. This vignette serves as a placeholder for a PDF vignette only, and the real vignette was written in R Markdown with **knitr** (Xie, 2013b): <https://github.com/yihui/formatR/wiki/>. The R Markdown source can be found at <https://github.com/yihui/formatR/tree/master/vignettes/formatR.Rmd>, or in the installation:

```
system.file("doc", "formatR.Rmd", package = "formatR")
```
